**11<sup>th</sup> Commerce Students of VISMA**

It is very important to have a healthy attitude about money and the ability to manage it. Sooner or later our Kids are going to be on their own. They should not come to your doorsteps when they grow up. They should know how to manage the money independently. You want them to develop right attitude towards money. It is not just about managing money, but also values which are attached to it like Philanthropy and responsibilities. These are values which are not only important for finance, but also in life.

Everyone wants to make a good living and wants to make it now. There is no patience. People do not want to make an effort. They want everything very easily. People who are doing well in life or who have made it, worked for it. It does not come easy. In fact, nothing comes easy in life. One has to work for it.

**'Bonjour'** is our way to teach value of hard work and money to our Students'.
